# Choroidal Melanoma Chart Abstraction

**RECORD IDENTIFIER:** CM00001

## History

1. **Date of birth**
   - February 1950

2. **Date of treatment**
   - February 2007

3. **Gender**
   - Male

## Examination

1. **What was the pretreatment thickness of the tumor in mm?**
   - [mm]
   - Not Documented

2. **What was the pretreatment maximal basal diameter of the tumor in mm?**
   - [mm]
   - Not Documented

3. **Is there documentation of preoperative assessment for liver metastasis?**
   - Yes

## Surgery

1. **Was a biopsy performed?**
   - Yes

2. **What was the apical radiation dose?**
   - [Gy]

3. **Was a rectus muscle detached?**
   - Yes

4. **What form of radiation was used?**
   - 125-I
   - Helium Ion
   - Proton
   - Other

4a. **If other, please specify:**
   - [Not Documented]

## Communication

1. **Was there documentation of informed consent for surgery?**
   - Yes

2. **Was the patient counseled regarding molecular testing for prognosis?**
   - Yes

3. **Was there documented communication with the patient's primary care physician or oncologist within 1 month of initial diagnosis?**
   - Yes
<table>
<thead>
<tr>
<th>Outcomes</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>1. At any time during the 5 year follow-up did the tumor increase in size (more than 1 mm in thickness; more than 2 mm in basal diameter)?</strong></td>
</tr>
<tr>
<td><strong>2. At any time in the 5 year follow-up period did the patient develop anterior segment neovascularization?</strong></td>
</tr>
<tr>
<td><strong>3. Did the patient develop diplopia that persisted beyond the 6 week postoperative period?</strong></td>
</tr>
<tr>
<td><strong>4. At any time during the 5 year follow-up was the treated globe enucleated?</strong></td>
</tr>
<tr>
<td><strong>5. At any time during the 5 year follow-up, did the patient develop metastasis, or die from melanoma related causes?</strong></td>
</tr>
</tbody>
